Opening Systems by Scigno

Market leader since 1987

For over 30 years, Scigno has been making sliding and swing opening systems. Innovative, practical and versatile design solutions entirely manufactured in Italy which improve quality of life.

THE FIRST SCRIGNO DOOR

In 1989, Scigno patented the metal-framed pocket door system: for the first time, a door disappeared inside a wall.

AMONG THE BEST-KNOWN*

Recent market research shows that Scigno is the brand recognised as leader in the Opening Systems market, both by consumers and professionals.

THE MOST RECOMMENDED*

Over 90% of customers who have chosen Scigno recommend and recommend the brand, as they were fully satisfied.

SCRIGNO

Design and quality Made in Italy.

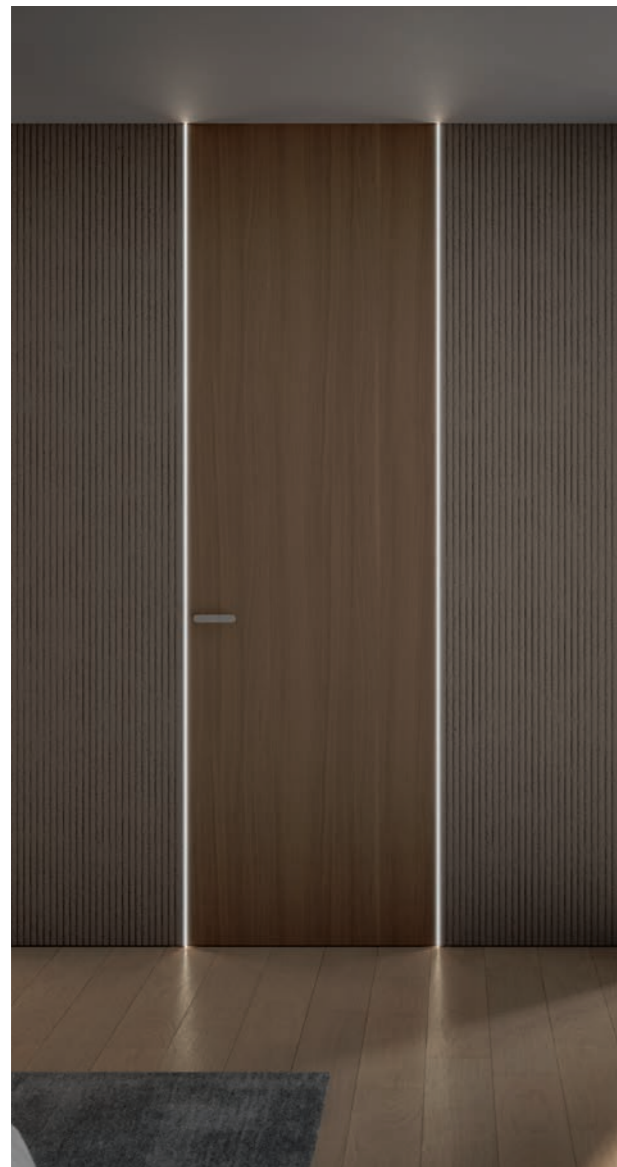

Since 1989, Scigno has stood out for its inimitable approach to innovative design, as well as its design expertise. This expertise is recognised all around the world as the most authentic expression of Italian-made products, the result of constant R&D and superior manufacturing quality. This creative leadership in the opening systems market is today regularly expanded by numerous partnerships with important designers, interior designers and architectural studios in Italy and around the world: this is what leads to the consistent birth of new ideas which are able to open up living spaces, freeing the creativity of those who design them, and the emotions of their residents. Because our mission is to grasp the spirit of every project and to build real value in day-to-day living.

Essenze Line

Wood-finish interior doors represent a fusion of form and function.

An elegant, refined and exclusive range of doors, able to warm any interior space with a genuinely unique touch.

Their versatility allows them to adapt to different architectural and aesthetic styles of domestic and commercial environments. The wood grain conveys a welcoming and authentic sense. The wood finish doors integrate harmoniously into the atmosphere, lending personality and character to the overall environment.

SWING CONTROLUCE

Controluce elegantly incorporates LED lighting into a flush-fitting door.

Developed by Scrigno in partnership with architect Egidio Panzera, Controluce represents a new interpretation of the passage between different living areas, with an original use of light.

The combination of light and shadow is highlighted, creating an evocative, high-impact illuminated frame around the door. It offers extensive customisation possibilities for the lighting, depending on whether or not a crosspiece is present, for total design and stylistic freedom.

DOOR FRAME AND COVER/HANDLE FINISHES

Available in select finishes such as lime-washed open-pore oak and natural matt black walnut. Matt paint finish in any RAL colour is possible, or a primed version is available for total customisation and integration of the door into the interior design.

White lacquered open pored ash

Natural matt Canaletto walnut

Lime lacquered open pored oak

Matt lacquered in all RAL colours

Cream lacquered open pored ash

Open pored grey oak

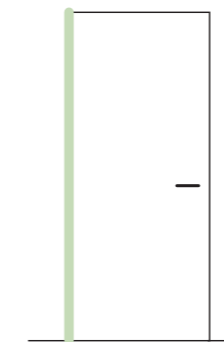

Open pored natural oak

SLIDING LACCATA

Our lacquered doors are the ideal option both for modern and more traditional living spaces. They offer extensive customisation possibilities through a huge range of colours and finishes. The versatility of these doors is a distinctive feature which allows them to perfectly adapt to a range of aesthetic and functional requirements.

SWING PIUMA

Piuma is the innovative flush-fitting door which offers gradual, silent closing thanks to its soft-close system. Its countless customisation possibilities allow for the creation of a harmonious and discreet space, while still lending style to the room. Sleek, essential doors which provide the greatest possible freedom for design and furnishing.

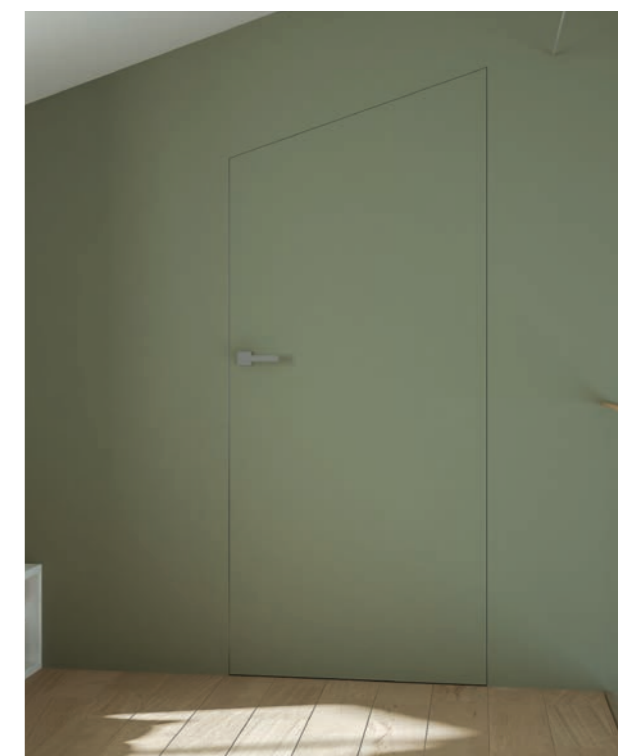

SWING RELAX

The Relax flush-fitting swing doors help create a harmonious atmosphere thanks to the lower acoustic air seal fitted as standard which provides optimum comfort. A functional and versatile design option, to be invisible or charismatic, depending on the style choices.

SWING TRAPEZOIDALE

Trapezoidal flush-fitting swing door, with crosspiece from 60 to 89°; it is ideal in environments with limited height under the eaves, such as loft rooms and conversions. It offers versatile solutions with infinite implementation possibilities. The door can be finished with a choice of materials, making it a genuine design element. The lack of edging trims and the finish of the panel allow the wall and door to combine into a single stylistic element, in continuity with the environment, making it welcoming and visually broader.

Laminated Line

SWING SENZA TRAVERSO

Flush-fitting swing doors without crosspiece are the ideal solution for large, spacious environments. The door is full height, the lack of edging trim and the finish of the panel allow it to integrate into the different environments.

Virtually infinite aesthetic customisations are possible: the panels can be painted, lacquered or covered with wallpaper, guaranteeing the widest freedom of expression.

SLIDING LAMINATA

Scrigno offers a huge range of extremely modern, sober and refined solutions which respond to the most contemporary market trends. Ideal for those looking for sliding doors in high-quality laminated wood with aesthetic impact. They are an excellent choice for those looking for doors with an elegant design and reliable performance.

COLORS RANGE

This model designed by Scrigno offers a smooth door with flawless surfaces, available in two different options: a refined matt lacquer, and a gloss lacquer which reflects light in an appealing fashion. Also available in a matt lacquered open-pore ash version to add a touch of warmth and natural finish to the room. The available colour range includes eight standard RAL colours, with all RAL finishes available on request.

COLORS RANGE

The panel features a strong solid spruce frame and is covered with laminate finishes. White laminate, white or grey rosewood, white veined, anthracite oak or walnut, each adds its character and warmth to the environment. A functional and tough door, but also a design element which can transform any living space into an elegant and stylish environment.

Primer Line

Pre-primed doors offer the greatest versatility. This type of door can be painted, lacquered or decorated with finishes, prints or wallpaper in order to become a distinctive element of the interior design. This permits an enormous range of creative possibilities in customising the doors.

SWING BATTENTE50

BATTENTE50 is a flush-fitting system offered with 50 mm thick pre-primed door panel, providing enormous customisation potential. Solidity, security and versatility are its distinctive features.

SWING FILO44

The Filo44 flush-fitting swing door is the smart solution. Easy to install and fully reversible and rotatable: the direction of opening can be chosen during installation. Pre-primed finish to allow the highest level of customisation. Door panel thickness of 44 mm, available in standard sizes.

Mirr

SLIDING MIRR

Mirr is Scigno's spectacular flush-fitting glass sliding door, designed to create the perfect marriage of strength and elegance, function and technical quality, able to guide the passage of light and sound in order to improve the fruition of internal living areas. A premium, high-design solution, with a carefully curated, minimalist appearance which is extremely versatile as it is available in a range of finishes and colours. It is a sophisticated solution which enhances any interior design scheme.

SWING MIRR

Without doorposts or edging trim, its reflections are enchanting. An element with an extremely fluid nature, it lends itself to more refined living spaces, thanks to its sober lines and infinite available shades. The elegance of the glass, the harmony of the flush-fitting installation, the practicality of the swing door.

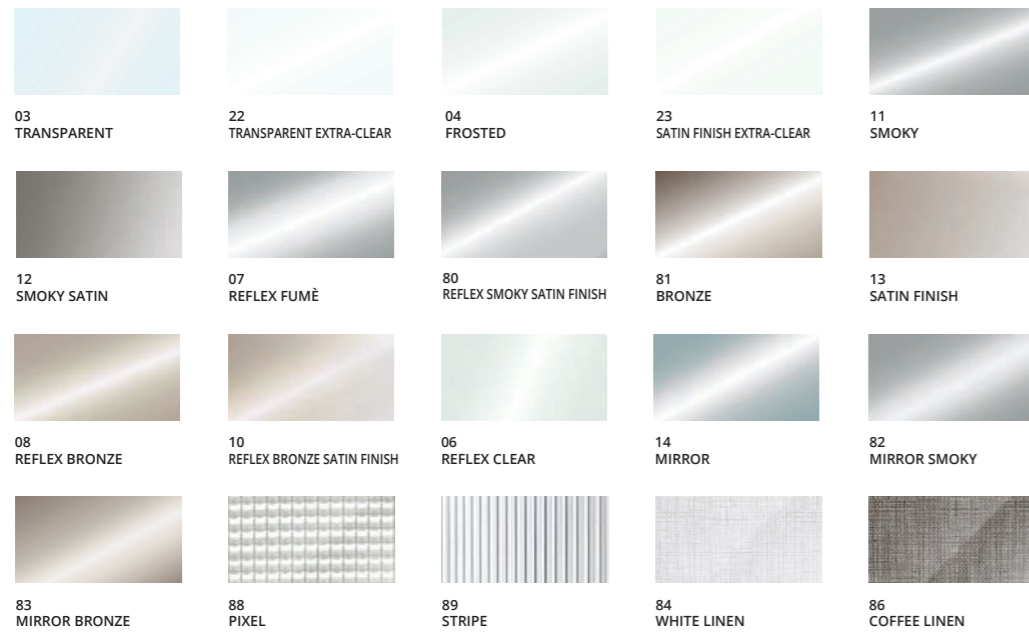

DOOR FRAME AND COVER/HANDLE FINISHES

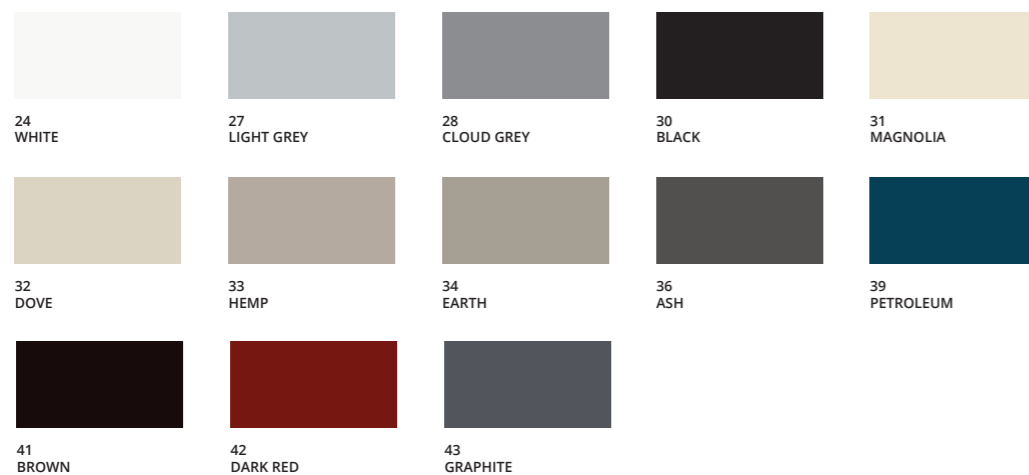

The available options include transparent, satin, reflex, smoked or bronze glass, and it is also available in mirror version, in addition to a wide range of shades which can be selected for the lacquered glass version, in gloss or satin finish, from warmer and romantic nuances to more metallic and industrial options. The aluminium details can also be customised.

GLASSES

LACQUERED

SLIDING Acqua

The Acqua door brings together glass and aluminium to enhance and enrich any living space with elegance and refinement, whatever the overriding style. Available in a wide range of variants, its finishes can be selected from a rich palette of available shades.

Acoustic System

In order to provide the highest levels of comfort, soundproofing plays a key role in the design of living spaces. Scrigno has created an exclusive and complete system which combines quiet and high design. The solution is tested to EN ISO 10140-2: 2010 and EN ISO 717-1: 2013, standards which regulate the measurement and laboratory testing of soundproofing of buildings and their components.

SLIDING ACUSTICA

The flush-fitting acoustic solution is a system able to provide exceptional soundproofing performance, composed of Essential counter frame, acoustic door leaf, dedicated hardware and chiudiscrigno kit.

The system provides a noise reduction of 39 dB when tested in plasterboard partitions of finished thickness of 125/150 mm.

SWING ACUSTICA

Scrigno's range of acoustic solutions is further expanded with the flush-fitting acoustic swing door solution. It provides 28 dB of sound reduction thanks to the use of a hollow chipboard panel and installation of dedicated fixed seals.

Fire Door System

Scrigno's innovation has led to the creation of this flush-fitting swing fire door system. The solution is certified to EN 1634-1:2009 and is available in EI 30-EI1 30 or EI 60 / EI1 60 version. A perfectly flush-fitting solution, without doorposts or edging trims.

SLIDING EI 30

A sliding opening system composed of counter frame, door, door closer, soft close and chiudiscrigno kit, designed to provide compartmentation in the event of a fire. The door leaf, made from insulating material, and hardware with intumescent seals, are designed to withstand fire for up to 30 minutes. The elegant design does not require edging trims, guaranteeing performance without compromise.

SWING EI 30 / EI 60

The elegant design does not require edging trims, guaranteeing performance without compromise.

The EI1 30 and EI1 60 models provide 30 min and 60 min of resistance to fire, respectively. The fire door system incorporates a solution with frame + door leaf + dedicated hardware in order to guarantee the resistance to fire performance. The panel is 60 mm thick and composed of hardwood frame and insulating material, air sealing intumescent seals and door closer as standard.
